

HELICOPTER BLADE CRANES

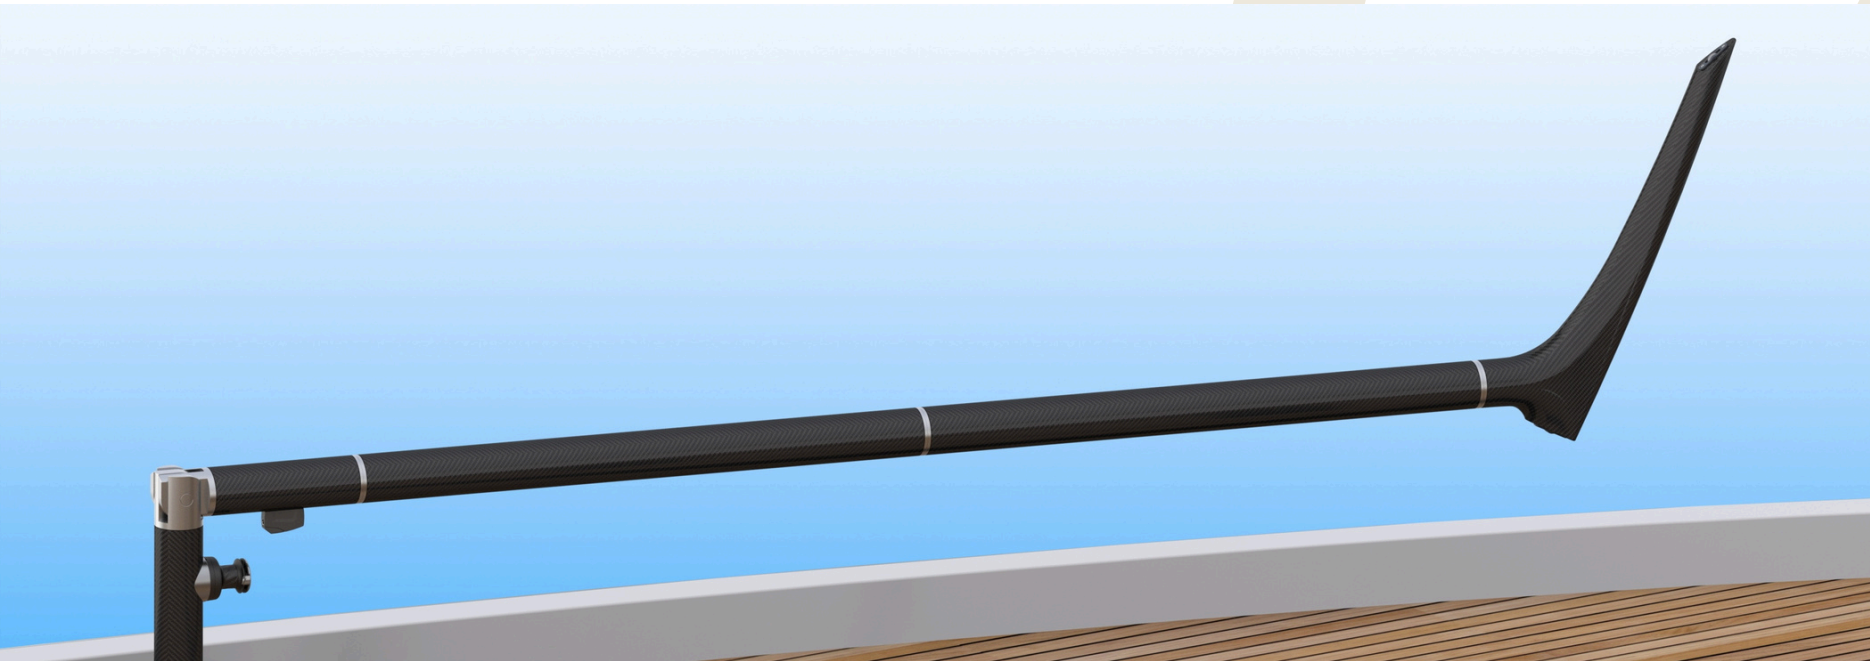

EASY HELICOPTER OPERATIONS!

With this product, the process of (un)installing the blades of a helicopter on a yacht will be made easier by its user-friendly system that was developed entirely in-house.

Easy storage is guaranteed due to its dividable system into different sections, being controllable with a press button.

The product is suitable for different types of helicopters such as an Airbus H160 and the preferred safe working load is not only calculated but also tested.

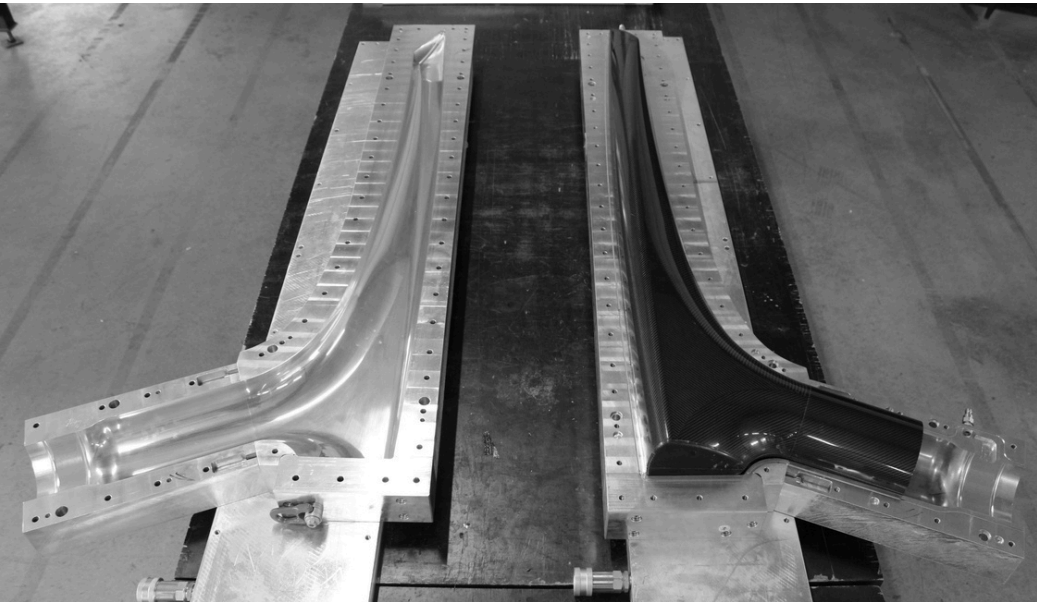

Divisible in 4 different sections for easy storage

Height of 6m to cover H160 and bigger helicopter types

To fit in existing deck inserts

Parts are connected to each other with a one finger press solution
