

# LIGHTING OPTIONS FOR SHADING SYSTEMS

## ENLIGHTEN THE SHADING AREA

Tec Wire's shading systems can be customised to meet specific requirements. One such customisation is the addition of lighting to the sun awning poles, for which there are several options.

We offer up-lights, which can be magnetically attached to the pole or integrated into it. With this light, there is the option of adding a down-light. Besides these, a vertical LED strip can be integrated into a pole.

These options ensure the shading area is well-lit and can be used in the evening hours as well.

Power button that is controllable by tapping (3 modes)

(Magnetic) mounting to Sun Awning pole

Ambient warm white dimmable LED up-light

Magnetic lights are chargeable by inductive power station

Optionable: RGB-W LED and Wi-Fi control

Also available with down-light option
