ANTIGUA LINE

LIGHTWEIGHT AND EASY-TO-HANDLE!

With a very simple, yet effective engineering, the Antigua-line is a must-have for many superyachts. Its round shape enhances the compatibility with adding a light system (integrated into the pole or with a magnetic click-on version).

The Antigua-line optionally features a distinct bent shape, combining style with advanced functionality. Precise strength and effortless installation are ensured due to its hand tool-operated tensioning system.

Its unique pole design adds a sophisticated touch, making it a standout choice for those seeking a blend of elegance and user-friendliness.
